

Anti-His-Tag Antibody “OGHis” Now Available Directly from the Clone Inventor

Promotion Period
Sep. 14, 2026 – Nov. 30, 2026

About the OGHIs Clone

- ✓ Established by Takao Hamakubo and colleagues in collaboration with Kyoto University.
- ✓ **10+ years** of proven research use
- ✓ Cited in **Nature, Nature Communications**, and other leading journals
- ✓ Now directly **from the clone inventor**
- ✓ WB / IP / ELISA / FCM6
- ✓ **Conjugated formats available**

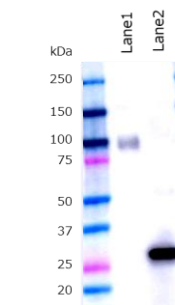

OGHis Developer:
Takao Hamakubo, MD, PhD
President, PhotoQ3
Professor Emeritus,
The University of Tokyo

- Expert in antibody engineering and therapeutic antibody research
- Former Professor at the University of Tokyo and Nippon Medical School
- Involved in the generation of more than 3,000 antibody clones
- Co-developer of the OGHIs clone

Specs

Product	Anti His-Tag Antibody
Clone	OGHis
Isotype	Mouse IgG2ak
Clonality	Monoclonal
Buffer	PBS(-), sterilized
Label	Unconjugated
Applications	WB/IP/FCM/ELISA

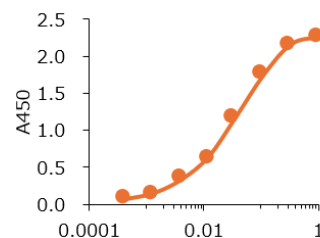

Western Blotting

Lane 1: C-terminal His-EGFR
Lane 2: N-terminal His-CDH17 pept

ELISA

Coated: C-terminal His-EGFR

Conc. of OGHIs (μg/mL)

Cat. No.	Product	Conc.	Volume	List Price (JPY)
Pab-05-100	Anti His-Tag Antibody 100 μg	1 mg/mL	100 μL	¥25,000
Pab-05-200	Anti His-Tag Antibody 200 μg	1 mg/mL	200 μL	¥50,000

Promotional pricing also available for HRP, fluorescent, and biotin conjugates. Contact us for details.

Regular Price

¥25,000 (100μL/vial)
¥50,000 (200μL/vial)

30~40% OFF

Special Offer

¥17,500 (100μL/vial)
¥30,000 (200μL/vial)

Up to 70% OFF

First Order

Limit: 1 vial per organization

¥10,000 (100μL/vial)
¥15,000 (200μL/vial)
